 [Akshat jain](#) |  [akshatjain306](#)

EDUCATION

• Bennett University (Times of India Group)

Bachelor of Technology in Computer Science Engineering

◦ CGPA: 7.5/10

Sept 2022 – Jul 2026

Greater Noida

SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), C++
- **Machine Learning & AI:** Machine Learning, Deep Learning, Neural Networks, NLP, LLMs, Transformers, Model Training & Evaluation, TensorFlow, Keras, Scikit-learn, OpenCV
- **Data Science & Processing:** Pandas, NumPy, Matplotlib, SciPy, Data Preprocessing, TF-IDF, Word Embeddings
- **Backend Development:** Flask, FastAPI, REST APIs, API Authentication (JWT, OAuth2)
- **Full-Stack Development:** React.js, Node.js, Express.js, MERN Stack
- **Database Systems:** MongoDB, MySQL, Firebase (NoSQL)
- **Tools & Technologies:** Git, GitHub, Postman, VS Code

PROJECTS

• Fake News Detection System (ML + NLP)

Python, Scikit-learn, TF-IDF, Flask

- Achieved **92% accuracy** in binary text classification using Logistic Regression, SVM, and Naive Bayes.
- Built a complete **NLP preprocessing pipeline** (tokenization, stemming, TF-IDF) for robust feature extraction.
- Developed a **Flask REST API** and lightweight UI for real-time prediction with confidence scores.

Jan 2024 – May 2024

• MedVerse AI — Intelligent Medical Diagnosis Platform (Full Stack + AI)

Tools: React.js, Python, Flask, TensorFlow, OpenCV, NLP, Vercel

- Built a multi-modal **AI diagnosis system** combining **NLP, CNN-based image classification**, and medical text mining.
- Developed **TensorFlow/Keras CNN models** for X-ray anomaly detection using image preprocessing and feature extraction.
- Integrated **Transformer-based LLMs (Gemini, ChatGPT API)** for medical summarization and explanation generation.
- Designed a scalable **FastAPI/Flask ML backend** enabling asynchronous inference, optimized model serving, and reduced latency.
- Engineered secure file upload pipelines and optimized **model loading + GPU-friendly inference paths**.
- Built a reactive **React.js (Vite) frontend** for real-time AI predictions and multi-modal visualization.

Aug 2025 – Nov 2025

• Lost And Found Management System (Android + Firebase)

Android Studio, Java, Firebase

- Developed a multi-screen Android app for reporting and searching lost items with secure **Firestore Authentication**.
- Implemented **Firestore NoSQL database** for real-time item listings, search filters, and image uploads via Cloud Storage.
- Designed responsive XML UI screens including login, register, dashboard, and item upload, improving navigation and performance.

Mar 2023 – Jun 2023
